For toothpastes, toiletries, cosmetics, food products and pharmaceuticals. Printed rolls, ready for tube forming. Using flexo, letterpress or combination printing.

AWARDING WINNING LABELS

Complex label structures, multi-page booklet labels, piggy-back products with scratch patches, special laminates and sealing. Also Peel-&-Reseal labels. Combination printing in up to 16 colours. Many optional converting features.

CUSTOMER SERVICE

We supply spare parts and consumables for all Ko-Pack and KPG presses,irrespective of location.

Additionally, KPG operates a 'Drum Exchange Scheme', which enables a refurbished CID to be shipped in exchange for an existing drum. So minimising press down-time and maintaining print quality.

Technical data sheets are available on our web-site. Videos of presses operating can also be viewed. www.kpgeurope.com

CONTACT US

Whether you have a general enquiry or a specific question relating to a press, spare parts or maintenance support, let us know. We look forward to hearing from you.

KPG SPECIALIST PRESSES

Based on experience – built for performance

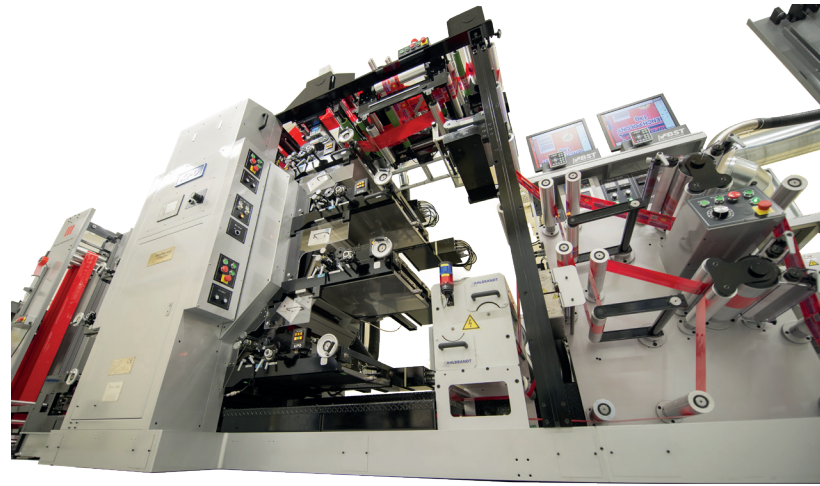

High quality printing combined with reliability are key factors of KPG for supplying worldwide, purpose designed printing presses for flexible packaging and complex labelling applications.

With 50 years' experience of building presses to meet specific customer demands, KPG recognises the production and mandatory standards required when printing artificial food casings, ABL/PBL tube barrier laminates and specialist labels.

EUROFLEX CASING PRESSES

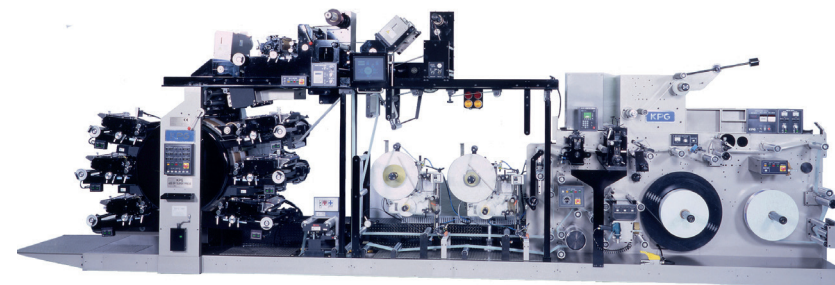

- Euroflex presses for printing polyamide artificial casings, polybags and films.
- Up to 18 colours, 360° printing for all-round graphic designs.
- 260mm, 400mm and 520mm web widths
- Choice of press design; twin-drum for single pass production or dual-pass printing
- Non-stop production, minimal down-time, minimal wastage.
- Temperature controlled CID and chill rollers as standard. Label production also available.
- Extremely robust construction, manufactured from 150mm and 100mm cast iron.

SPECIALIST LABEL PRESSES

- Labels from standard p.s. to complex booklet and 'piggy-back' structures.
- 'Scratch-off' applications, security seals, lottery tickets and consumer incentives.
- Many converting options.
- Designed on a central impression drum concept, print register is assured.
- Multi-web/substrates combine paper, boards and film in one-pass.
- Choice of web widths 260mm or 400mm, with 4 – 16 colours.
- Many options including pre-coating, varnishing, laminating, foiling, web scanning.
- Operator friendly with consistent colour density and high-quality finishing.
- Maximum press utilisation with technical flexibility giving production choice.

Technical details for all KPG presses are available on www.kpgeurope.com

KPG WIENER PRESS

- Purpose designed for cost effective production of printed wiener and narrow web casings.
- Suitable for use with solvent, alcohol and water based inks. Also UV cationic inks.
- High quality printing, at high speeds of up to 150m/min. Stored job parameters ensures consistent production standards.
- Dual-pass production with up to 4-colours being printed on each side of web.
- With a maximum 210mm web width, casings from 27mm – 95mm wide can be printed on both sides. Single pass full web width printing is also possible.

EUROFLEX TUBE PRESSES

- Based on a central impression drum design, pin point register is assured.
- Standard press web widths 260mm, 400mm and 520mm with up to 8-colours on a single CID, plus varnish and foiling.
- Chilled CID (flexo printing) and chill roller.
- Servo driven expansion roller for pre-stretching ABL fitted as standard.
- In-line corona treatment, flexo varnishing, slitting and ultra-sonic sensors also fitted as standard. Many optional features.

KPG DIGICASE

- Digitally printing polyamide casings and bags, food packaging films and plastics.
- Dual-pass and single-pass printing available in 4 web widths.
- Cost effective short-runs. Ideal for JIT orders, language and code changes.
- Choice of print speeds and resolution.
- User friendly software. Ease of operation 'Drag – Drop – Print'.
- Instant job changes, with minimal waste and minimal down-time.
- Many options, including flexo varnish, flexo print heads, additional digital heads and coder module. Internet diagnostics.

KPG SPECIALIST PRESSES

- Euroflex presses for printing artificial casings, ABL/PBL laminates, polybags and packaging films and labels.
- Designed for reliability, to operate 24/day, 7 days/week, 52 weeks/year.
- 260mm, 400mm and 520mm web widths with many converting options.
- Non-stop production, minimal down-time, minimal waste.
- Extremely robust construction. Manufactured from 150mm & 100mm cast iron, guaranteeing virtually no vibration, even when printing at high speeds.
- Comprehensive after-sales service and customer support.
